

PROVIDER network

managing CHRONIC disease

Health care professionals play a vital role in patient care. We understand the impact that education, personalized support, and specialized services can have on the health outcomes of those living with chronic disease. That's why we're pleased to offer our eligible plan members **reimbursement for targeted health services** through a network of health educators and practitioners.

HOW THE PROGRAM WORKS:

Eligible Medavie Blue Cross plan members living with asthma, COPD, or diabetes now have access to one-on-one respiratory disease management and one-on-one diabetes counselling sessions provided by a network of **designated health professionals** - including respiratory therapists, registered nurses, pharmacists, dietitians, and other licensed allied healthcare professionals.

There is **no physician referral required**, so eligible members will have direct access to these services. Services that qualify for reimbursement include educational assessments, and the planning and implementation of appropriate interventions and patient supports.

To learn more about the program and the benefit to your customers, visit medavie.bluecross.ca/en/health-professionals/resources

Select "Medavie Blue Cross," then "Managing Chronic Disease Service Providers"

join

OUR CHRONIC DISEASE MANAGEMENT NETWORK!
