

Calling on CDE's in BC to Connect!!!

Are you a CDE who works in the community setting in British Columbia?

Cherryl Pacheco, a pharmacist working in an Primary Care, is looking to connect with pharmacist CDEs (pharmacists) who would be able to be an added support for patients in the community. She's is working on trying to bridge the gap between hospital discharge back into community, and is particularly interested in connecting patients on insulin, (e.g., new starts) with CDEs in the community to help patients until their first visit with a doctor or Diabetes Education Centre.

To contact Cherryl and learn more about how CDEs can work together:
